

AMIT RAWAT

Software Engineer with 3.5+ Years of Backend Development and System Design Experience

8287052861 | amitrawat9810@gmail.com | LinkedIn.amitrawat9810

SKILLS

CORE SKILLS: JavaScript, TypeScript, System Design, Database Design, DSA, Software Architecture

FRONTEND: React.js, Next.js, Redux, Webpack, HTML5, CSS3, SASS

BACKEND: Node.js, Express.js, REST APIs, Socket.IO, Microservices

DATABASE: PostgreSQL, MongoDB, MySQL, Redis, Sequelize, Mongoose

MESSAGE QUEUES: Apache Kafka, RabbitMQ

DEVOPS & TOOLS: Docker, Git, PM2, NGINX, Postman, Agile, AWS (EC2, S3)

EDUCATION

B.Tech in Mechanical Engineering

Maharishi Dayanand University

Aug 2017 – May 2021 | Aggregate: 71%

Senior Secondary (Science)

Aakash Model School

Apr 2013 – Mar 2016 | Percentage: 70%

WORK EXPERIENCE

INTEGRAL INFOGEN TECHNOLOGIES PRIVATE LIMITED | Software Engineer Jan 2023 – Present

- Built **Node.js – PostgreSQL boilerplate** framework reducing project setup time by **30%** and conducted **security audits** remediating critical vulnerabilities in **Eddal Application** increasing maintainability by **40%**.
- Architected scalable backend services and **800+ secure REST APIs** for a **Dealer Management platform**, managing **6,000+ dealers** and enabling **2,200+ member registrations** across **7 business modules**, reducing feature integration time by **20%**.
- Refined relational database schemas and PostgreSQL queries, improving data retrieval performance by **25%**.
- Crafted **30+ reusable React.js** and **TypeScript** components with a metadata-driven form framework, accelerating feature delivery across **7 modules** by **40%**.
- Orchestrated deployments using **Docker**, **AWS (EC2, S3)**, and **CI/CD pipelines** across **3+ production environments**, reducing deployment time by **35%** and improving release consistency.
- Engineered a reusable **Node.js–JasperReports** integration that compiled report templates and generated PDF invoices, receipts, and operational reports on demand, reducing manual processing effort by approximately **5 hours per day**.

PROJECTS

ESCORTS KUBOTA DEALER MANAGEMENT SYSTEM | Full-Stack Developer | IITPL Jun 2024 – May 2025

- Architected **Escorts Kubota Dealer Management System** modules including **Finance, Material, Purchase, Sales, Admin, Member** using **React, Node.js, Express.js, PostgreSQL, Docker**.
- Delivered a scalable **Member Management** platform serving **2,200+ active members** across a network of **6,000+ dealers** of Escorts Kubota Limited.
- Engineered a **metadata-driven form framework** with reusable UI components, validation rules, and configurable workflows, reducing new form development effort by **40%** while improving data-entry accuracy by **30%**.
- Enhanced database queries and caching (**Redis**) reducing data retrieval time by **25%** across high-traffic modules.

VIVEK TRAVELS (CAR & TOUR BOOKING PORTAL) | Full-Stack Developer | IITPL May 2025 – June 2025

- Developed a **React-based travel booking platform** showcasing **1,400+ fleet vehicles** (cars and buses) with searchable fleet catalogues, service discovery, and inquiry workflows.
- Attained **500+ monthly user interactions**, validating market adoption and platform reliability in real-world use.
- Delivered a fully **responsive, mobile-first UI**, achieving **90+ Lighthouse Performance Score** and consistent rendering across modern browsers.

LOAN & FINANCE ASSISTANCE PLATFORM (EDDAL) | Full-Stack Developer | IITPL June 2025 – Present

- Built a secure **Loan Management System** enabling finance assistance, EMI scheduling, and repayment tracking for **2,200+ association members**.
- Implemented **automated invoice & receipt generation, email/SMS EMI reminders**, and repayment validation ensuring **100% financial accuracy**.
- Developed a reusable email notification service that automated **300+ monthly emails** for EMI reminders, overdue notices, and promotional campaigns, reducing manual communication efforts.
